

Step-By-Step Instructions

Snail:

- 1-Start with the colored side of the paper facing up. Fold and unfold both diagonals.
 - 2-Turn the paper over and fold it horizontally and vertically in half. Then unfold.
 - 3-Rotate the paper 45 degrees clockwise. Then, fold along the dotted lines using the existing creases to create a square base.
 - 4-Fold and unfold the right flap to the center line.
 - 5-Open the right flap and squash fold using the creases made in Step 4.
 - 6-Repeat Steps 4 and 5 three more times on all sides.
 - 7-Fold the right flap along the dotted line so the angle is reduced by about one-third.
 - 8-Fold the top flap's right edge to meet the centerline.
 - 9-Fold the top left flap in half so its left edge lines up with the centerline.
 - 10-Once again, fold the top left flap in half so its left edge lines up with the centerline.
 - 11-Turn the model over and repeat Steps 7 to 10.
 - 12-Flip the top left flap over to the right side, then repeat on the other side.
 - 13-Repeat Steps 7 to 10 on both sides. This time:
 - On the left flap, fold it into thirds by making two equal folds. Each fold turns in about one-third of the angle.
 - On the right flap, fold it into thirds too, but do it by folding in half twice.
 - 14-Flip the top right flap over to the left side, then repeat on the other side.
 - 15-Now focus on the top of the model. Carefully make an inside reverse fold on each of the two side flaps. These will become the snail's antennae.
 - 16-On each side, tuck the two center flaps inward so they're hidden inside the model.
 - 17-Gently lift the snail's antennae so they point forward, in front of the head. Then, fold the bottom corner upward along the dotted line. This will make the shell stand upright.
 - 18-Swirl and shape the antennae however you like.
 - 19-Gently open and stretch the vertical layers until they puff out like a balloon. This will form the snail's shell.
- TIP:** Go slowly here. Use both hands to shape the shell evenly without tearing the paper. A little patience makes a big difference!
- 20-Your origami snail is completed.

NOTE:*If you are a beginner, then use Kami paper to make origami. While for experts, You can use Origamido paper, Tant paper or double tissue paper*
