

Step-By-Step Instructions

Squirrel:

1-Start with the white side of the paper facing up in a diamond position. Fold along the vertical diagonal, then unfold.

2-Fold the top edges in to meet the centerline.

3-Fold the right corner in to meet the centerline. Crease well, then unfold.

4-Inside reverse fold along the creases made in Step 3.

5-Repeat Steps 3 and 4 on the left side.

6-On the right top flap, fold the bottom edge to meet the centerline. Crease well, then unfold.

7-Inside reverse fold along the creases made in Step 6.

8-Fold the flap created in Step 7 upward.

9-Repeat Steps 6 to 8 on the left side.

10-Mountain fold the model in half from right to left.

11-Rotate the model 90° clockwise.

12-Fold the top left corner down to the reference point. Crease well, then unfold.

13-Fold the bottom left edge up to meet the left edge of the triangle. Crease well, then unfold.

14-Now focus on the right side of the model (this will become the squirrel's head). Fold the white triangle along its right edge. Crease well, then unfold.

15-Fold the right corner in to meet the same reference point. Crease well, then unfold.

16-Crimp fold along the existing creases from Steps 12 and 13.

17-Inside reverse fold the white triangle along the crease from Step 14.

18-Inside reverse fold the flap from Step 17 along the crease made in Step 15.

19-Fold the right corner along the dotted line so that the top edges align. There's no exact reference. Crease well, then unfold.

20-Inside reverse fold along the crease from Step 19 to form the squirrel's snout.

21-Fold the top flap's right edge to the nearest vertical crease. Make a small pinch mark at the bottom edge level, then unfold.

22-Fold the flap again so that the pinch mark aligns with the vertical crease.

Tip: As you fold, the flap will cover the vertical crease. Turn the model over to help align them accurately.

23-Repeat Step 22 on the other side.

Tip: You won't need a pinch mark this time. Just align the flap with the one you made in Step 22.

24-Fold the tail along a dotted line starting at the point where the leg and tail intersect. Leave a small gap between the squirrel's ears and the tail.

25-Fold the top corner of the tail downward along a dotted line. There is no exact reference.

26-Fold the right corner of the tail inward along a dotted line. Again, there is no exact reference.

27-Your origami squirrel is completed.

NOTE:*If you are a beginner, then use Kami paper to make origami. While for experts, You can use Origamido paper, Tant paper or double tissue paper*
